Question	Adjustment of supply voltage		
Decision	<p>The supply voltage is adjusted only once during the test of sub-clause 19.101 namely when the heating elements are adjudged to have reached steady state. The text of 19.101 should read: The supply voltage, determined prior to the test, is that required to provide the relevant power input under normal operation when the power input has stabilized. This voltage is maintained throughout the test.</p>
