Annex B

to the Agreement on the use of a commonly agreed Mark of Conformity
for certain electrical equipment complying with European Standards

Standards covered by this Agreement and relevant limitations, if any

This document is updated annually during the MCCB meeting.

Changes between the meetings are following the relevant OD ENEC 306 Scope extension of ENEC
The actual list of standards in the ENEC scheme scope is on the ENEC website: //www.enec.com, page “ENEK MARK SCOPE”.

Applicable document: PD ENEC 308 Evaluation of Factory Location

NOTE:

*Of all Standards listed in this Annex, the latest available editions (dav) and amendments shall be considered.
During the transitional period ENEC licences may be granted according to an old standard, or a standard which is being superseded,
until three months before the date of withdrawal (dow). See OD ECS 012 for details.*

NOTES

- *) The agreement is applicable to products complying with the indicated standards and with the limitations and/or modifications indicated in this column. The limitations take into account, as far as possible, the special national conditions and A-deviations applicable in the countries of the ENEC Agreement signatories.

Column "Evaluation Factory Location" (details in PD ENEC 308):

- ① = Luminaires and associated components
② = All other Product Categories

List of limitations

- Item 1: EN 60598-1 Luminaires
- clause 2.2 Class 0 luminaires are not in the scope of the Agreement;
 - clause 3.2 For luminaires to be connected directly to the supply the rated voltage shall be 230 V or a range including 230 V. , or for 3 phase supply a range including 400 V.
 - clause 3.3 The Certification Body, granting the licence, shall check the correct wording of the mounting instructions, if any, in a language acceptable to it. The manufacturer shall take care of the correct wording in other required languages (with or without assistance of the Certification Body).
 - clause 5.2.1 Luminaires provided with a plug shall be equipped with one of the following types
 - IEC 83
 - class I: luminaires - Standard sheets: C4
 - class II: luminaires - Standard sheets: C5*, C6
- *) Identical to EN 50075
- Luminaires for use in Great Britain:
- IEC 83
 - Class I: Standard sheets: B1, B2
- GENERAL NOTE: For Class I luminaires the plug may be in accordance with the National Standard Sheet of the country to which the luminaire will be marketed.
- clause 5.2.2 Flexible cables and cords with PVC insulation are not accepted on luminaires intended for use outdoors.
- For horticulture luminaires the ENEC Requirement Sheet ERS 002 has to be applied and indicated on the license.

- Item 1.22: EN 60598-2-22 - Luminaires for emergency lighting
- Spain: Special national conditions for Spain, as indicated in annex ZB to EN 60598-2-22 (see corrigendum of October 2007).
- Any luminaire for emergency lighting intended to be marketed in Spain shall carry a warning (e.g. in the instruction sheet) stating either,
- when checked satisfactorily to the above mentioned national conditions:
 “Este aparato cumple con los requisitos adicionales para los locales de pública concurrencia en España”
 (“This appliance has been checked satisfactorily to the additional regulatory requirements for public buildings areas in Spain”)
 - when not checked to the above mentioned national conditions:
 “En este aparato no se han comprobado los requisitos adicionales para los locales de pública concurrencia en España”
 (“This appliance has not been checked to the additional regulatory requirements for public buildings areas in Spain”)
- Item 15: EN 60570 - Electrical supply track systems for luminaires
- clause 4.3 Track-systems shall exist of at least a track, supply connector, coupler and adapter.
 - clause 4.3 All components according to the manufacturers catalogue shall be subject to testing.
 - clause 4.3 Adapters, provided with socket outlets are not accepted, as the track-system is only intended for connection of luminaires.
 - clause 4.3 Multi-adapters as a single component are excluded from the ENEC mark, as the adapter manufacturer can not control the dimensions of the essential parts of the third party track.
 - clause 5 The catalogue shall not include any information about the use of the track-system or adaptor that is not controlled by the licensee.
 - clause 5 ENEC mark is only allowed on the tracks or the supply connectors. ENEC mark on the single adapter is not allowed.
 - clause 5.5 Warnings according to sub clauses 5.5 and 5.6 respectively shall be given either on the track-system or the mounting instructions, delivered with the track-system.
- NOTE: Adapter interface components, not forming a fixed part with the luminaire can be accepted for ENEC mark if all relevant requirements of EN 60598-1 are fulfilled.
 Special attention is given to the fact that adapter interface components are not covered by EN 60570 and the luminaire standard EN 60598-1 does not give a defined testing program for these products.
- Item 21: EN 60730-1: to be used in conjunction with the appropriate Par 2 for a particular type of control, or for controls for particular applications. Part 1 may also be applied, so far as reasonable, to controls not mentioned in a Part 2, and to controls designed on new principles, in which cases additional requirements may be considered to be necessary.
- Item 24: EN 60998-1 - Connecting devices for low voltage circuits for household and similar purposes.
 Part 1: General requirements
- EN 60998-2-1, 2 and 3 - Connecting devices for low voltage circuits for household and similar purposes.
 Part 2: Particular requirements
- Scope: For components intended to be used only in appliances

- Item 25: EN 60999-1 - Connecting devices Electrical copper conductors
To be used only as an accessory to EN 60998
- Item 29: EN 50075 - Flat non-rewirable two-pole plugs, 2,5 A 250 V, with cord.
Any appliance fitted with a Europlug and intended for use in the UK shall carry a warning label stating: "Within the UK, this appliance may only be used when supplied from a shaver supply unit in accordance with EN 61558-2-5 and must not to be connected to a UK mains socket.
- Item 33: EN 60335 - Household and similar electrical appliances
Limitations due to Special National Conditions and A-deviations as given in the respective standard apply.
- Item 33:1 Not for standalone ENEC certification:
1, EN 60335-1 standard is not suitable for ENEC certification unless accompanied by a Part 2 applying to the product to be certified.
2. If no Part 2 exists for the product to be certified, the EN 60335-1 standard with a uniform particular requirement should be used for certification.
The responsible OSM-HA (Operational Staff Meeting for Household Appliances) should develop and document a specific ENEC Requirements Sheet (ERS) program for the product. This ERS decided by OSM-HA has to be added to ENEC scheme scope and is mandatory for similar products by all CBs.
- Item 39.1: EN 61951-1 clause 8: a EN 61959 test report of a ENEC laboratory need to be available
clause 9 a EN 62133-1 test report of a ENEC laboratory need to be available
GENERAL NOTE: performance, safety and mechanical requirement for normal handling and application
- Item 39.2: EN 61951-2 clause 8: a EN 61959 test report of a ENEC laboratory need to be available
clause 9 a EN 62133-1 test report of a ENEC laboratory need to be available
GENERAL NOTE: performance, safety and mechanical requirement for normal handling and application
- Item 39.3: EN 61960-3 clause 1: a EN 61959 test report of a ENEC laboratory need to be available
clause 1 a EN 62133-2 test report of a ENEC laboratory not older than 1 years need to be available
GENERAL NOTE: performance, safety and mechanical requirement for normal handling and application
- Item 39.4: EN 62133-1 clause 5.6,6. If investigating battery packs than cells can be either already ENEC certified or should be tested with the battery pack.
It is allowed to state conformity to EN 61959 on the certificate if it has been tested within the ENEC laboratory
GENERAL NOTE: safety and mechanical requirement for normal handling and application
- Item 39.5: EN 62133-2 clause 5.6,6. If investigating battery packs than cells can be either already ENEC certified or should be tested with the battery pack.
It is allowed to state conformity to EN 61959 on the certificate if it has been tested within the ENEC laboratory
GENERAL NOTE: safety and mechanical requirement for normal handling and application
- Item 39.6: EN 62620 can only be certified in combination with either the safety standard EN 62133-2 or EN 62619
For cells which are used in batteries for emergency lighting a EN 62133-2 test report of a ENEC laboratory not older than 1 years need to be available.
For cells and batteries for industrial applications a EN 62619 test report of a ENEC laboratory not older than 1 years need to be available.

- Item 39.7: EN 62619 clause 5.6. If investigating battery packs than cells can be either already ENEC certified or should be tested with the battery pack.
- Item 39.8: Requirement to section ERS 001 section 2.1, if investigating battery packs than cells can be either already ENEC certified or should be a test report available of an ENEC laboratory according to the standards EN 62133-2:2017 and EN 62620:2015 latest amendments.
- Item 40: EN 60799 For cord sets, restricted to plug according to EN 50075 with a nominal current of 2.5A
- Item 50: EN 62776 - The lamp manufacturer shall put the following sentence in the instruction of use:
"Compatibility of this lamp with the luminaire shall be checked with the luminaire manufacturer"
- Item 63.2: EN IEC 61051-1 is not in the scope of the ENEC scheme as standalone standard
- Item 73: EN 62262 cannot be used as a standalone standard for ENEC certification purposes but used in combination with the safety standard of the product in question and be indicated in the ENEC certificate.
In case of luminaires, to be used in conjunction with IEC TR 62696
