

OSM/IN DECISION

Standard: EN 60669-1:1999 + A1:2002	Sub clause: 18.2	Sheet N°: OSM/IN 253
Subject: Lamps to be used instead of 200 W tungsten filament lamps	Key words: Tungsten filament lamp	Meeting N°: 20 (2010) Item: 3.3.2 b)
<p>Question: According to the European regulation endorsed by the Member States' committee meeting of 8 December 2008, lamps equivalent in light output to 100 W incandescent bulbs and above have been phased out from the EU market beginning from September 2009. Therefore the reference to 200 W tungsten filament lamps given in sub-clause 18.2 of EN 60669-1 is not appropriate. Which type of lamps can be used instead of 200 W tungsten filament lamps?</p> <p>Decision: 200 W tungsten filament lamps to be used for the test of 18.2 can be replaced by directional incandescent lamps.</p> <p>Explanatory notes: This OSM/IN decision is based on the decision agreed by CLC/TC 23BX during the 24th meeting held in London on June 17th and 18th, 2009 (item 11.3, TC23BX/Sec0194/RM). During this meeting CLC/TC 23BX also decided to give the task the Interpretation Panel to prepare an Interpretation Sheet for the modification of sub-clause 18.2. This OSM/IN decision remains in force until the above mentioned Interpretation Sheet will be published.</p>
